PROJECTS

Student Assessment Notification System

Developed a digital communication system to send assessment notifications and exam marks directly to parents via email, streamlining parent-teacher communication in the modern educational environment. Technologies: Email integration, Database management.

Library Management System

Developed a comprehensive library management system using Python and database integration. The system enables efficient tracking of books, member registrations, issue and return processes, and generates automated reports. Features include search functionality, due date reminders, and fine calculation for overdue books.

CERTIFICATIONS

- ★ Completed Government certified course on Data Science with Python from MSME-Technology Development Centre, Chennai
- ★ Certificate course on 30 Days Master Class on Java Programming - Pantech e Learning
